(54) LUMINAIRE WITH ANTIBACTERIAL FUNCTION

(57)Abstract:

PROBLEM TO BE SOLVED: To overcome such problems that a method of carrying an antibacterial agent on the surface of a luminaire is effective as a simple method for disposing of bacteria flowing in the atmosphere but remarkably deteriorates the antibacterial effect when getting the surface of the luminaire dirty.

SOLUTION: The antibacterial agent 16 and a photocatalyst 17 are carried on the outer surface of an arc tube in the luminaire or the inner and outer surfaces of an arc tube fixing fixture 11.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
